INTRODUCING VORTEX

Vortex Schoolwear has been supplying printed and embroidered uniform to primary and secondary schools for over 20 years.

We are a trading subsidiary of Vortex Clothing Company Ltd, one of the leading garment printers and embroiderers in the UK today.

We have remained at the forefront of our industry because of our passion for quality in all aspects of our business. This has been instrumental in developing long term relationships with our customers. We pride ourselves on this commitment whatever the size of project.

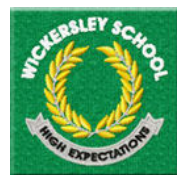

SALES AND CONTACTS

The team at Vortex are always happy to advise on all aspects of our services and you will find specific contacts for administration, sales and production.

We have always backed up our ability with a friendly and efficient customer service department.

We guarantee to process your requests for prices, garment samples and delivery times swiftly, as well as offering advice based on our extensive experience.

PRODUCTS WE SUPPLY

As you would expect from a premier supplier with our experience, we supply a tried and tested range with the full complement of sizes and colours. Our long established relationships with major manufacturers means that we can respond quickly to high and low volume fast turnaround orders, without any drop in standards of product quality or decoration finish..

VORTEX EMBROIDERY

Investment in the latest automated embroidery production line has resulted in numerous new school account wins for Vortex. The flexibility of our production facility means it is possible to produce multi coloured complex logos quickly and efficiently alongside simple low run, single colour designs.

VORTEX PRINT

This was the key discipline for VORTEX when we started in business over 20 years ago. We pride ourselves in having embraced automated technology whilst developing colour skills and experience that you will find hard to match in our industry.

DESIGN AND PRODUCTION

Vortex design and production departments look after all their own digitising for embroidered logos and also their own separations for colour printing. This means the overall decoration process is controlled from the earliest point, which allows us to create the best result using the best techniques.
